» WATER METER MONITORING SYSTEM

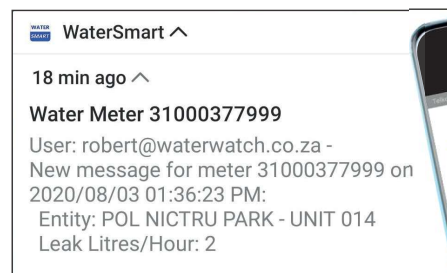

Manage your water usage with the Waterwatch water meter monitoring system:

- The Waterwatch **control box** is connected to your existing water meter provided that it is compatible. Alternatively, a separate meter with control box can be installed just after your existing meter.
- This control box transmits consumption and other data by means of **wireless communication** on the **Sigfox network** where it can be viewed on the **WaterSmart** mobile app or a web portal.
- You will receive **notifications** of a possible leak on the mobile app or email.
- You can also view meter readings and other information on our **web portal**.
